

DATE: 12TH AUGUST 2024

CLOSE DATE: 13/8/24 AEMO's Inputs Assumptions and Scenarios Report (IASR)
consultation FY25 and FY26

<https://www.aemo.com.au/consultations/current-and-closed-consultations/2025-iasr-scenarios-consultation>

I wish to submit the following information for public consideration.

- 1) Anthropogenic Global Warming (AGW) is a concept which flies in the face of existing scientific understanding, and so no action should be taken regarding AGW.
- 2) Australia had a reliable electricity power supply which has been destroyed by reaction to AGW. This has resulted in severe decline in our manufacturing competitiveness, and should be immediately terminated.
- 3) AGW has resulted in Australia being seriously weakened militarily and should be immediately terminated.

In support of these claims, I submit the contents of my report "CIR-Australia" available at <https://bosmin.com/ICS/CIR-Australia.pdf>
